U.S. Inflation Pressures Downshift

“The Fed risks being blindsided by a cyclical downturn in inflation. That is the clear and present danger as monetary policymakers continue to dismiss the recent dip in inflation due to ‘one-off’ factors, while clinging to their conviction that the Phillips curve will prevail.” – *U.S. Essentials, June 2017, Vol. XXII, No. 6*

Growth Upturn Gathers Steam

“Many are misreading the ‘hard’ data as very weak, even as the Fed is set to stay the course on its rate hike cycle. That is the essence of our earlier outlook that Janet Yellen echoed when she said after last week’s rate hike: ‘The simple message is the economy is doing well.’” – *U.S. Essentials, March 2017, Vol. XXII, No. 3*

“ECRI Outlook” – November 2016

India: Growth Outlook Improved Further

“Indian economic growth prospects continued to brighten through the early autumn, according to ECRI’s Indian Long Leading Index ... {Thus, while} Indian economic growth is practically certain to take a serious hit due to the sudden liquidity squeeze in the current quarter and the first quarter of 2017 [it will return] to its prior trajectory [after avoiding recession].” – *International Essentials and Country Pages, November 2016, Vol. XXI, No. 11*.

“ECRI Outlook” – September 2016

Exceptional India

“While global growth decelerates and world export volumes decline, India is bucking the trend. Moreover, Indian export growth prospects continue to improve.” – *International Focus, September 2016, Vol. XXI, No. 9*

“ECRI Outlook” – September 2016

Global Industrial Growth Boosting Commodity Prices

“ECRI Outlook” – August 2016

Global Reflation

“ECRI’s international future inflation gauges show a widespread buildup of cyclical reflationary pressures, despite sustained structural lowflation.” – *International Essentials, August 2016, Vol. XXI, No. 8*

“ECRI Outlook” – August 2016

Recession Risk Retreats

“The U.S. economy has veered away from a recession track, and may finally be on the cusp of a growth rate cycle upturn. If so, the ‘stagflation lite’ we had flagged earlier this year should give way to an inflationary upswing in economic growth.” – *U.S. Essentials, August 2016, Vol. XXI, No. 8*

“ECRI Outlook” – July 2016**Inflation Pressures Ratchet Up**

“In sharp contrast to the decline in longer-term inflation expectations, ‘stagflation lite’ – a cyclical upturn in inflation during a cyclical slowdown, which we had predicted earlier – is already a reality. Looking ahead, with the U.S. Future Inflation Gauge (USFIG) in a decisive upturn that is increasingly pronounced, pervasive and persistent, inflation is poised to mount further in the coming months.” – *U.S. Essentials, July 2016, Vol. XXI, No. 7*

“ECRI Outlook – June 2016**Brexit No U.K. Recession Trigger**

“While potentially damaging longer-run U.K. and European growth prospects, the vote for Brexit is unlikely to unleash an immediate recession.” – *International Essentials, June 2016, Vol. XXI, No. 6*

“ECRI Outlook” – March 2016**Stagflation Lite**

“An end to the economic slowdown remains elusive. Yet, underlying inflation pressures – though relatively restrained – have started perking up.” – *U.S. Essentials, March 2016, Vol. XXI, No. 3*

“ECRI Outlook” – January 2016**Recession Not at Hand**

“Although some economists continue to expect a pickup in U.S. growth... with USLLI growth sliding to a 23-month low, there is no end in sight for this GRC downturn. In other words, the slowdown is set to intensify for the foreseeable future, i.e., through the first half of 2016. As to whether this deepening slowdown will culminate in a recession, the jury is still out. Whereas a recession signal requires the level of the USLLI to be in a pronounced, pervasive and persistent downturn, the magnitude of its decline from its August high has so far been modest.”

2015: Collision Course

“ECRI Outlook” – December 2015

Rate Hike Cycle Remains Improbable

“With the GRC downturn set to deepen, a full-blown rate hike cycle remains improbable” – *U.S. Cyclical Outlook Essentials, December 2015, Vol. XX, No. 12*

“ECRI Outlook” – July 2015

Collision Course

“The Fed’s rate hike plans are on a collision course with the economic cycle. According to Fed Chairman Janet Yellen’s congressional testimony last week, ‘economic conditions likely would make it appropriate at some point this year to raise the federal funds rate target,’ i.e., if not by September, then by December. But while the Fed clearly expects a pickup in growth, ECRI’s leading indexes suggest the opposite.” – *U.S. Cyclical Outlook Essentials, July 2015, Vol. XX, No. 7*

“ECRI Outlook” – July 2015

One-Speed Economy

“The two-speed economy – where manufacturing is in a growth rate cycle (GRC) downturn and services in a GRC upturn – that we flagged in November has come to an inauspicious end. With nonfinancial services growth in a three P’s downturn and growth in the leading and coincident services indexes weakening, the service sector has entered a slowdown, joining manufacturing. This will likely result in an intensification of the ongoing U.S. GRC downturn in the coming months, as we noted recently.” – *U.S. Cyclical Outlook Focus, July 2015, Vol. XX, No. 7*

“ECRI Outlook” – April 2015

Brazilian Carnival: The Music Stops

“[T]he current cyclical outlook remains gloomy, with exports the only glimmer of hope. Therefore, recessionary conditions are likely to persist in the near future.” – *International Cyclical Outlook Focus, April 2015, Vol. XX, No. 4*

“ECRI Outlook” – January 2015

If Not Now, When?

“Given half a chance, the Fed would like to raise rates this year ... The sixty-four thousand dollar question is whether they will get that opportunity. ... [With] 5% GDP growth in Q3 2014, almost 3 million payroll jobs added in 2014, and the jobless rate ... approaching the Fed’s estimate of ‘full employment’ ... more than six years after rates hit the zero lower bound (ZLB), the question has to be, ‘if not now, when?’” – *U.S. Cyclical Outlook Essentials, January 2015, Vol. XX, No. 1*
